

Security Policy Statement

Seagull Maritime Security provides maritime security services to assist in the protection ships, ports and other maritime assets. We aim to continually improve the services we provide to meet our client's requirements by giving them reasonable scope to perform due diligence for the management of the services retained and by delivering a service that we can justifiably be proud of. We aim to set the benchmark for service and expertise across our industry.

The organisation is committed to a risk management approach to business planning and to achieving this by the documentation, implementation and maintenance of an Integrated Management System (IMS) that complies with the international standards ISO 28000:2007 and ISO/PAS 28007:2012. This IMS employs the core processes of threat identification, risk assessment and risk management. It also includes a commitment to meet the security requirements of our clients, as well as applicable legal and regulatory requirements and also to the continual development of the system and working to ensure it remains effective.

Only by providing an outstanding service and a secure supply chain will we achieve our aims of long term success and sustained improvements. All personnel within the company are responsible for the security of our supply chain and are made aware of this policy. The company provides relevant training and has established systems to assist all personnel to achieve the standards required.

The organisation is committed to the following security objectives:

- 001 to comply with applicable and relevant international and national laws, codes and regulatory requirements
- 002 to process all security related threats and risks and continually strive to reduce risk levels
- 003 to retain sufficient weapons and equipment in reserve in theatre to prevent any delays to the provision of the Service through loss or defects
- 004 to continually consider all technological options
- 005 to continually maintain adequate financial, operational and business infrastructure
- 006 to continually consider the views of appropriate stakeholders
- 007 to continually improve the system
- 008 the elimination or the reduction in frequency of particular undesired incident(s)
- 009 To consider the views of appropriate stakeholders

This policy will be reviewed periodically to ensure that it remains relevant and appropriate to our organisation and distributed to all stakeholders upon initial issue and after review.
